

### **Art Key Stage 3**

In art lessons students will develop their skills in: painting, drawing, 3d, textiles, clay, print and manipulation of mixed media. They will also learn that skills such as researching, analysing, evaluating and presenting will be carried across into other subject areas and that their art lessons are key to the creativity unlocked in the whole curriculum.

They will work from direct observation and imagination. They will study the role of other artists, designers, cultures and craftworkers. All students will explore a range of different materials through diverse student cultured projects which increase in difficulty through Key Stage 3.
